

ALUMINUM EUROGROOVE

Product Description:

Our Aluminum Eurogroove is a direct reflection of our drive to manufacture exterior doors to industry-leading dimensions for demanding architectural applications. This heavy-duty aluminum extrusion is specifically engineered to house our multipoint lock options while reinforcing the lock edge of our exterior doors beyond the capabilities of a stand-alone multipoint lock system. The integration of our multipoint lock options with this robust aluminum profile delivers enhanced structural strength, stability, and long-term performance without compromising design flexibility.

For more information about our Aluminum Eurogroove reach out to our knowledgeable team.
