

ELECTRONIC ACCESS CONTROL

Product Description:

Experience effortless security. Our electronic access control options simplify daily operation for both residents and guests. We offer two options compatible with our multipoint locking system: an Electronic Drive/Motor or an Electronic Battery-Powered Device. With either option, a simple command instantly retracts all locking points to grant access. Upon closing, the door automatically engages and locks securely, remaining ready for the next command.

PRODUCT BULLETIN:

Electronic Drive/Motor

The Electronic Drive/Motor option features concealed, integrated components that connect with virtually any universal home automation system, allowing professionals to customize access control settings without limitation.

Electronic Battery-Powered Device

The Electronic Battery-Powered Device provides a flexible, standalone option for independent access control. Access is easily managed through either a compatible keypad or a smartphone application.
