

## EXPOSURE-RATED EXTERIOR DOORS

### Product Description:

Our Exposure-Rated Exterior Doors are manufactured with Accoya® and Tricoya®, and are also available in split wood species featuring Accoya® and Tricoya® on the exterior surface. They are specifically designed and engineered for architectural applications and structures that do not meet the overhang requirements necessary to protect standard exterior wood doors. This innovation reflects our commitment to utilizing cutting-edge materials combined with industry-leading technical expertise to manufacture exterior doors with exceptional durability, stability, and long-term performance.

For more information about our Exposure-Rated Exterior Doors reach out to our knowledgeable team.

## **PRODUCT BULLETIN:**

### **Natural Wood**

Accoya modified wood is real wood, and it delivers all the beauty and character aesthetics, along with distinctive sensory touch and feel that you would expect with Natural Wood.

### **Ultra-High Performance**

Accoya modified wood is the ideal material for Exterior Doors with daily exposure to extreme weather conditions; its unmatched stability and durability outperform traditional wood species.

### **Low Maintenance**

Accoya's minimal movement and exceptional resistance to harsh conditions make it possible to deliver Exterior Doors with absolute confidence, and without concern for frequent maintenance therefore saving you time and money over the long term.
